

## **MAE 598 MEDM: Lab # 4**

Group 9: Tushar Vishwanath, Anand Anil Kumar, Sobha Srujana Patri, Tolemy Nibi

MAE 598: Topic: Mechatronics Engineering for Design & Manufac (MEDM)

Professor Cindy (Xiangjia) Li

April 30,, 2024

Question - Bonus Lab HW4

- Get familiar to mechanical components;
- Get familiar to linear motion control;
- Get exposure to building physical prototypes.

Task1: Build a prototype of a linear stage using a motor and lead screw.

Task2: Integrate the photoresist to calibrate the moving speed and demo 3 different moving speed of linear stage

## Physical Set Up

Circuit Diagram with connections.

Figure 1 &amp; 2

Figure 1

Name	Quantity	Component
U1	1	Arduino Uno R3
U2	1	H-bridge Motor Driver
R1	1	Photoresistor
R2 R4	2	1 kΩ Resistor
M1	1	DC Motor

### [3D printing simulation \(Chitubox\)](#)

TinkerCAD was used to model this circuit.

The photoresist was connected to the breadboard and input A0 and one 1000 Ohms resistor was utilized to protect the photoresist. A five volt power supply is used to run the system.

We utilize a regular motor for the lead screw mechanism as using a stepper motor with a lead screw would short the arduino kit provided to us.

### Code(s)

```
const int motorPin = 9; // Connect the motor control pin to digital pin 9
const int photoresistorPin = A0; // Connect the photoresistor to analog pin A0

void setup() {
  pinMode(motorPin, OUTPUT);
  // Initialize serial communication for debugging
  Serial.begin(9600);
}

void loop() {
  // Read the value of the photoresistor
  int photoresistorValue = analogRead(photoresistorPin);

  // Map the photoresistor value to motor speed (adjust the range as needed)
  int motorSpeed = map(photoresistorValue, 0, 1023, 0, 255);

  // Set the motor speed
  analogWrite(motorPin, motorSpeed);

  // Debugging output
  Serial.print("Photoresistor Value: ");
  Serial.println(photoresistorValue);
  Serial.print("Motor Speed: ");
  Serial.println(motorSpeed);

  // Add some delay to prevent flickering
  delay(100);
}
```

Note - In case of spacing issues the txt file has been attached here - [txt](#)
